Re: Mammoth Mine
DOGM File No. S/023/041

Dear Mr. Katona:

We have reviewed a copy of your Notice of Intention to Commence Small Mining Operations. We received a copy of the notice from the Division of Oil, Gas and Mining on November 22, 1994. This project is for underground mining of high-grade mine pillars and to explore and develop additional high-grade ore bodies in the existing Mammoth Mine.

On November 14, 1994, you met with Mr. Larry Mize, from our office, and myself to discuss the proposed mining operation. In this meeting, we requested detailed information on the waste dump, storm water diversion and waste rock characteristics for our review.

Following our review of the details of the proposed facility and the information requested, we will advise you whether you will need a ground water, discharge, and/or construction permits. The permits must be issued before you can begin construction of a process facility.

If we can be of further assistance, please contact me or Mr. Lyle Stott of my staff.

Sincerely,

Kiran L. Bhayani, P.E., D.E.E., Manager
Design Evaluation Section
